

Logical Reasoning – Illustration 7

Four Indians – Nathan, Bill, Jason and Rahul – and four Australians – Arif, Taskin, Michael and Sachin – are sitting around a circular table. Two Indians and two Australians are facing the centre of the table, while the rest four persons have their backs towards the centre. You need to figure out the exact way they are sitting using the statements given below.

1. Jason is sitting at the second position to the left of Michael.
2. Arif is sitting at the third position to the left of Taskin.
3. Nathan is the third person to the right of Rahul, who is facing the centre.
4. Bill and Sachin are sitting at diametrically opposite positions and facing each other. None of them is sitting next to Rahul or Arif.
5. No three Australians are sitting together.
6. Michael is not sitting next to Rahul.
